## *Prisol WP Liquid Dyes*

### **Product Description:**

Prisol WP range of liquid dyes comprises metal complex dyes dissolved in water/solvent combination. All grades exhibit good fastness properties and can be diluted with water and a range of organic solvents. They are optimized for use in water-based and water-containing wood stains.

**Applications:** For water based and water containing Wood Stains

### **Advantages:**

- Since these are ready dye solutions, it avoids tedious steps of dissolving the dye, filtration, removing salt and deciding on the right solvent.
- The solvent system used has been optimized for each color.
- Dry coatings based on Prisol WP dyes show good light fastness towards over-coating by paints containing Ketones, Esters and Aromatic compounds.
- Dyes can be diluted with both solvents and water.
